I design interfaces for complex, high-stakes professional tools, and then I build them. Two years as the sole designer on an AI video product, a bachelor capstone redesigning a fire inspection app with the Reykjavík fire service, and a broadcast graphics engine I built alone. Now on the MSc in Human-Computer Interaction & Design at KTH and looking for product design and design-engineering work in Stockholm.

EXPERIENCE

Lead Frontend Designer & Developer — QuickFlick.ai / FrameFill

Aug 2023 – Sep 2025

AI video creation platform for real estate agents · Reykjavík

- Sole designer on the product. I owned the whole interface: user flows, interaction patterns, layout and visual language. I also built it, in React and TypeScript, working directly with the CEO.
- The test for every decision was *can my grandmother do this?* Users were estate agents with no video experience, so the AI pipeline had to hide behind something that felt like an ordinary editor.
- Designed and built the internal admin environment behind that pipeline, covering custom prompts, model settings and workflow checkpoints, so non-engineers could change how the model behaved.

Software Engineer — Slökkvilið höfuðborgarsvæðisins

May – Aug 2026

Reykjavík Capital Area Fire & Rescue Service

- The fire service brought our capstone team back to finish Vörn, the inspection app we had designed with them, and to spend more time testing it with the inspectors who would use it. I carried the research findings and interaction decisions from the capstone into the production build.
- Shipped a complete inspection tool. It is going into use with the 20 to 30 inspectors in the capital region, with a national rollout to around 200 users planned.

Production Manager — Uppkast

May 2021 – May 2023

Icelandic streaming company

Ran video production for a streaming service's original programming, covering filming, editing and graphics. Set up the studios and defined the production and post-production workflows.

SELECTED WORK

Vörn — fire safety inspection app

2025

Bachelor capstone · Reykjavík University × Reykjavík Capital Area Fire & Rescue · graded 9.0/10

- Redesign of a decade-old in-house app that fire inspectors use on site. Team of three. I led the interaction flow and layout structure, and set up the .NET MAUI codebase so the others could focus on visual refinement and the backend.
- **Research:** user surveys, workflow mapping, and watching inspectors work on location.
- **Constraint:** inspectors move between rooms, talk to staff and handle equipment, so the interface competes with the job for attention. Minimising user error under distraction was an explicit design goal.
- **Decision:** inspectors told us the original overview screen was confusing, so I redesigned it from a passive summary into a combined status-and-action hub.

Archery Broadcast Graphics Engine — self-directed

2023 – present

Designed and built alone · in production use at national championships

- Replacement for the World Archery Federation's graphics package, which needed a dedicated Windows desktop tower. Cross-platform Electron and React engine that runs on the streaming machine itself and feeds OBS through a browser source.

- Designed the broadcast graphics package and the operator control panel, built for a 13-inch laptop with the essential controls always visible and never covering the workspace. Modelled on Blackmagic's broadcast software, but unlike theirs it is responsive.

Bogfimisetrið — website redesign

2026 – present

Client project for an archery centre in Reykjavík · bogfimisetid.is

- Complete visual redesign, built around one goal: moving bookings off the phone and onto the online system we introduced with it. The pages stay simple, and what a newcomer needs first, pricing, opening hours and safety, comes before the booking step.
- The site had to stay on WordPress. Rather than replace it, I designed and prototyped the whole thing in React and then ported it into a custom WordPress theme.
- I also run the centre's search and paid social: Meta and Google ads with tracking wired through to bookings, so I can see whether the design converts.

SKILLS

Design	UI & UX design · interaction design · information architecture · prototyping · user research: surveys, interviews, workflow mapping · usability testing · design systems · visual & graphic design · motion graphics · broadcast graphics design
Engineering	React · TypeScript & JavaScript · HTML & CSS · Astro · Electron · .NET MAUI (native mobile) · web services & REST APIs · databases · Firebase · Mapbox
Tools	Figma · Adobe After Effects, Premiere Pro, Illustrator, Photoshop · Blender · OBS · Blackmagic ATEM · Git · VS Code
Production	Live broadcast production · multi-camera and remote production · studio setup · video editing · 3D & CG asset creation · cinematography

EDUCATION

MSc ICT Innovation — Human-Computer Interaction & Design

Aug 2026 – Jun 2028

KTH Royal Institute of Technology, Stockholm

BSc Computer Science

Aug 2022 – Jan 2026

Reykjavík University · final grade 8.83/10 · 181 ECTS

Erasmus+ exchange — data science

Autumn 2024

Universitat Pompeu Fabra, Barcelona · artificial intelligence, network science, massive datasets mining, visual analytics, speech technologies

Diploma, CG & 3D asset creation for film and games

2020 – 2021

Think Tank Training Centre

LEADERSHIP & VOLUNTEERING

President — BF Boginn Archery Club

2020 – present

Iceland's largest archery club

- Elected president every year since 2020. I hire and manage the coaching staff, run the budget, schedule practices and summer camps, and organise competitions and events.

Live Streaming Producer — Icelandic Archery Federation

2019 – present

- Lead producer and commentator for every national championship broadcast. I specify and manage the equipment, and design the production setup so volunteers with no broadcast experience can run a camera or fill another role.

Teaching Assistant, Web Programming — Reykjavík University

Jan – May 2026

Languages Icelandic (native) · English (fluent) · Swedish (beginner, in progress)

Award Best Picture, Icelandic High School Short Film Awards, 2020
